

FEATURES

Our precast bollard is designed for multiple heights to reduce conflict with landscape materials and prevent vandalism from traffic in planters. The bollard provides for a stable mounting of landscape lighting, flood lighting and low level lighting.

- Weatherproof outlet box cover with 2 vandal resistant screws
- The aluminum cover is available with 1/2" or strong 3/4" NTP hubs
- Available colors for the cast cover are black, bronze or tan
- Insert flange is an injection molded polycarbonate which eliminates concrete fractures for the aluminum weatherproof cover
- Concrete cast bollard from natural stone aggregates and "Portland Cement" conforming to ASTM standards
- Internal tapered interior to accept up to four (4) 3/4" conduits with access from the top
- 5 year limited warranty
- Recommended that cast bollard be recessed into the finished grade a minimum of 2" or cast into a concrete walk
- The electrical installation shall be by others and meet all electrical codes
